YOUR Math Course

Compound Probability Problems

Throughout the school year we have discussed the "math curse" that we are all under, after reading the book *Math Curse* written by Jon Scieszka & Lane Smith in September. Your task is to come up with a problem you have in YOUR life that has to do with compound probability.

Directions: Write your problem here on this page. Give the reader all the information they need, then you must ask a question at the end of your problem!

YOUR Math Curse Problem:

FLIP OVER →

DIRECTIONS: You will create the answer key to your problem below. Create the sample space for your situation (in the tree, table, or list format), then answering the question you asked at the end of your problem on the front page. Remember to show all your work!
